

THE PEOPLING OF THE EARTH

Directions: Using the power point slides to guide you, trace the routes of Early Human migration on the map below, beginning in Africa. Be sure to label your arrows showing how many years ago each route took place.

1. What is human migration? _____

2. Where is the location of the earliest human remains? _____
3. Name 3 reasons why humans migrate to new biomes. _____

4. Explain the push – pull factors for migration:
PUSH ~ _____
PULL ~ _____
5. How long did it take for Early Humans to migrate all over the entire planet?

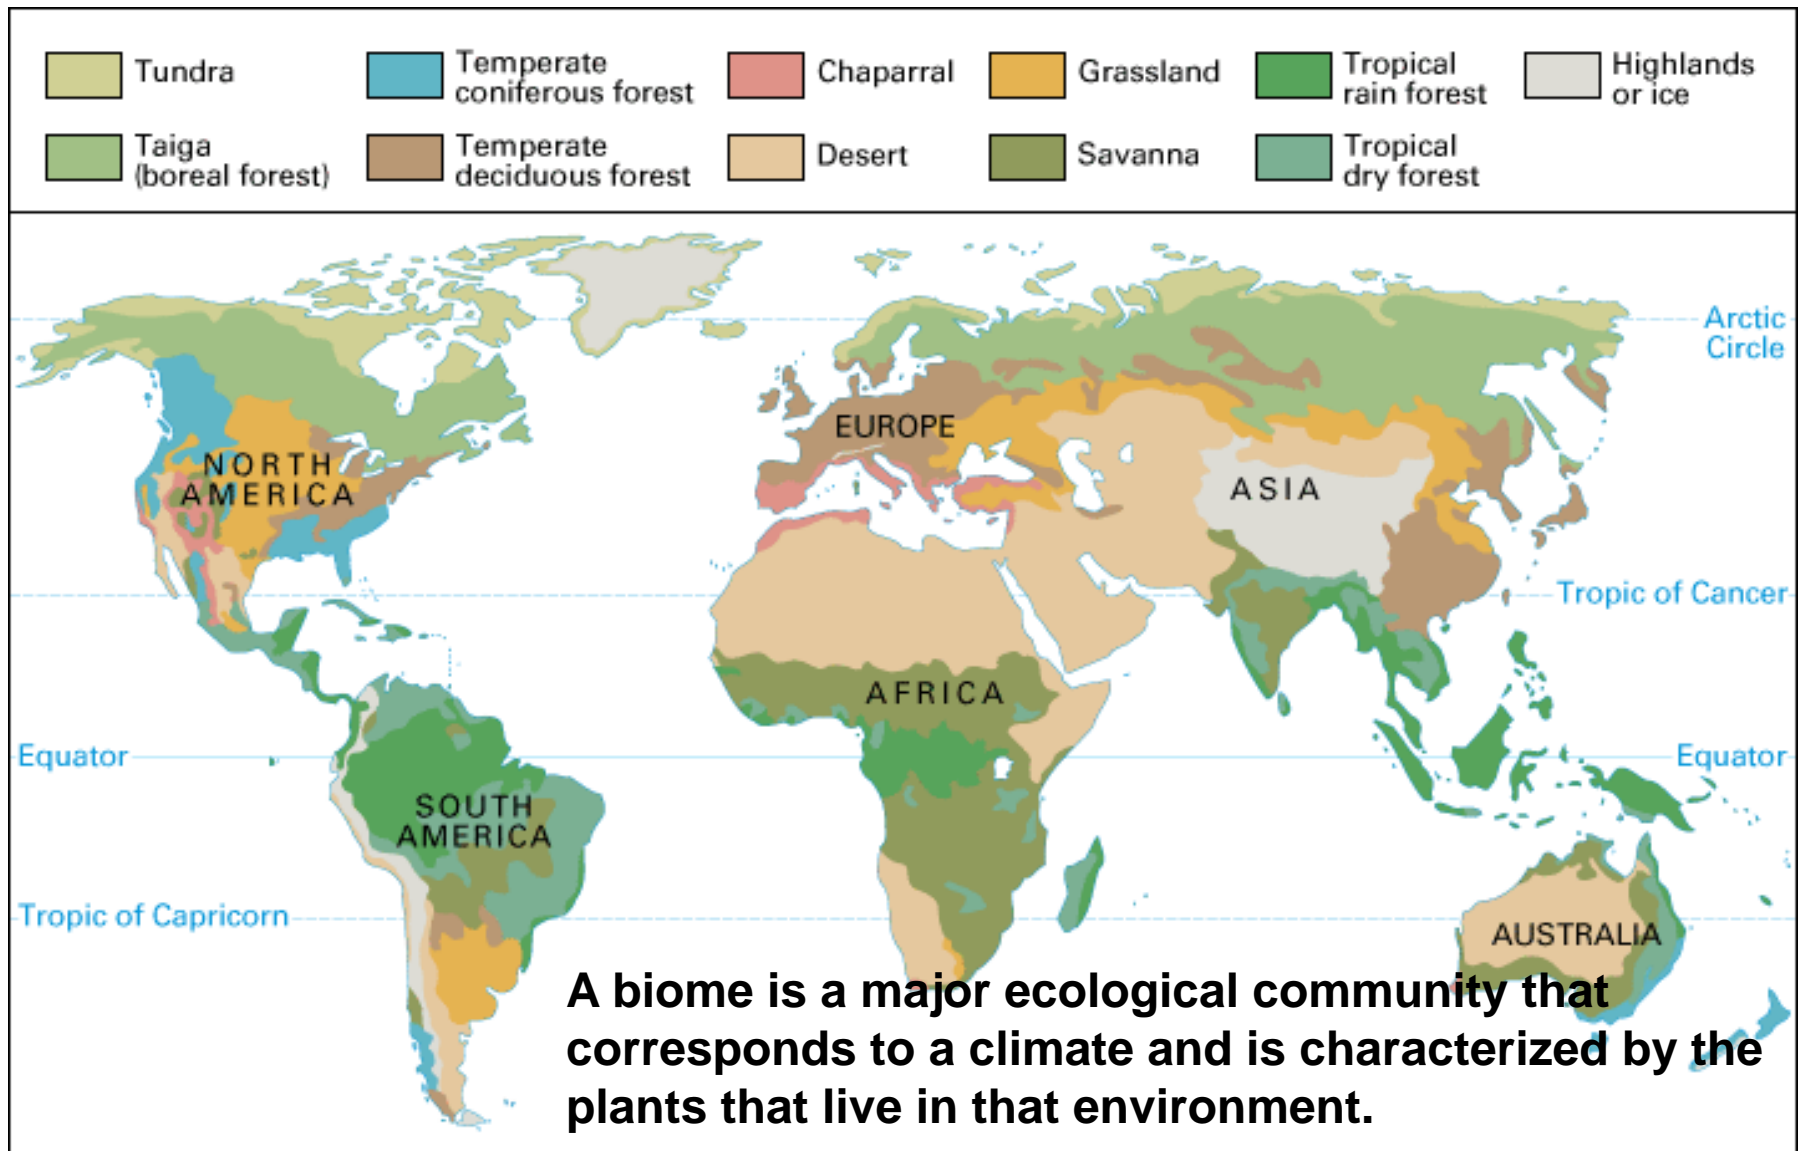

6. Why is human migration special and different from other animal species? _____

Biomes Map

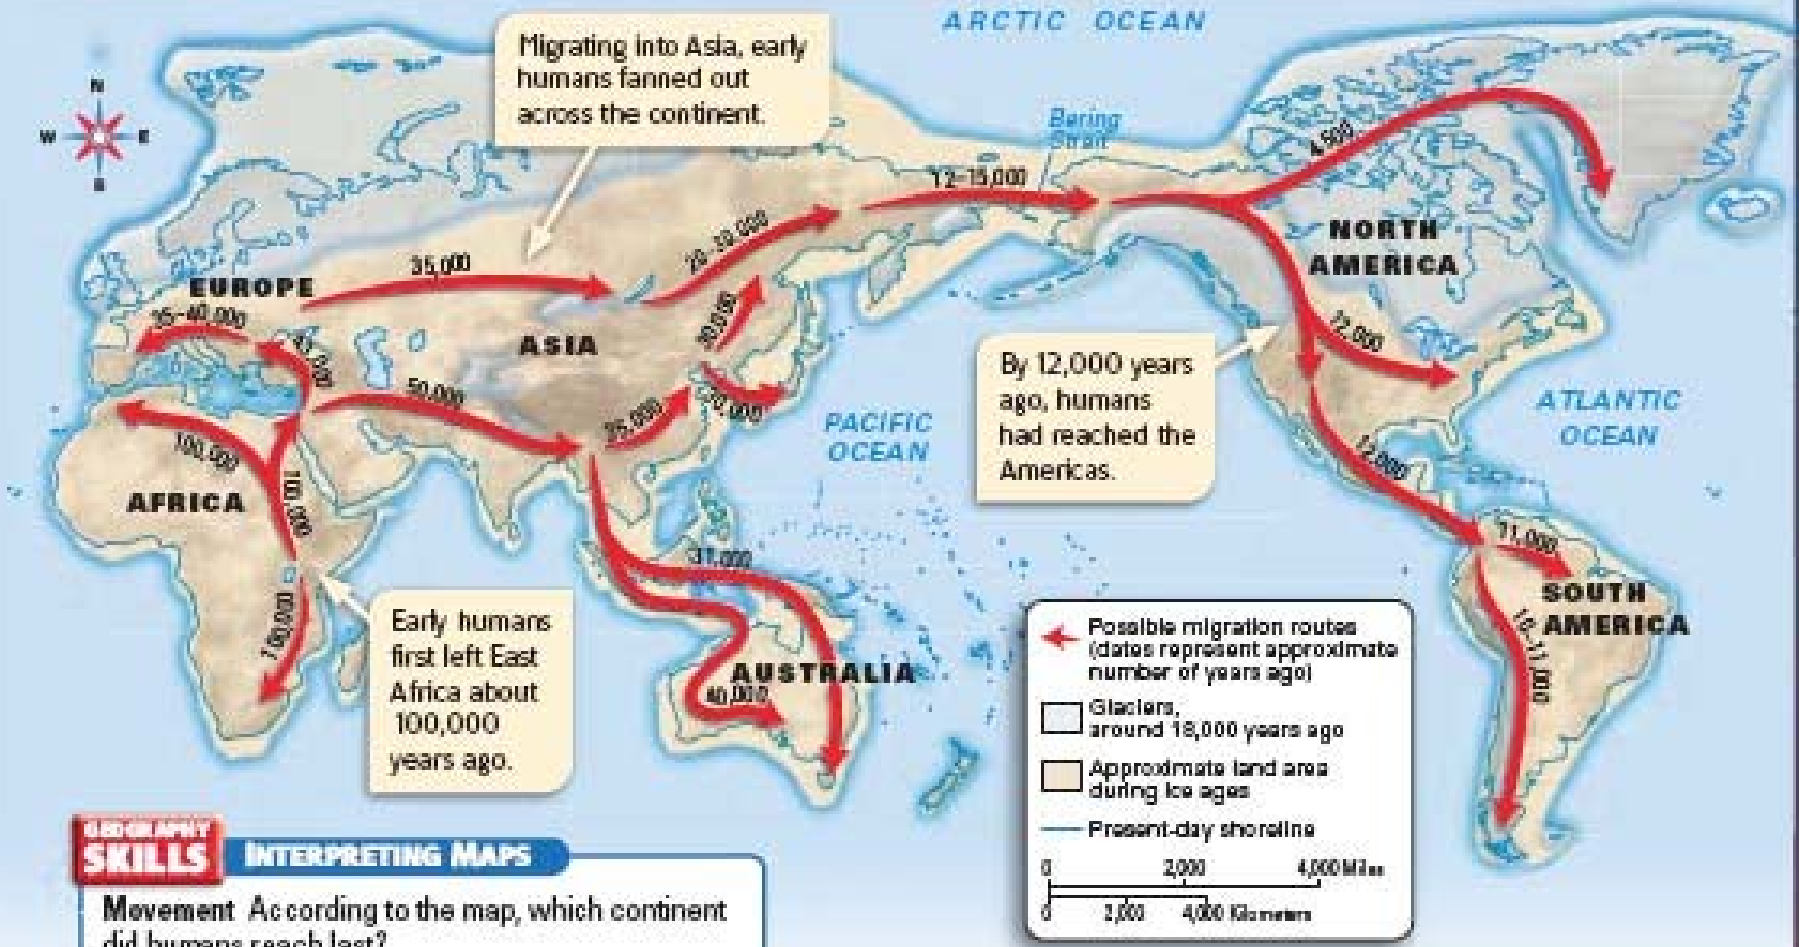

Which biome was where the earliest human remains were found?

What challenges to survival exist in that biome?

How would humans need to adapt if they moved to a different biome?

Early Human Migration

GEOGRAPHY SKILLS INTERPRETING MAPS

Movement According to the map, which continent did humans reach last?

Early Human Migration to 10,000 years ago
